

Don't blow up your computer!

Here is a co-worker's example of doing the right stuff with a suspicious email. Great job, Tim Krohn!

## Of the Week!

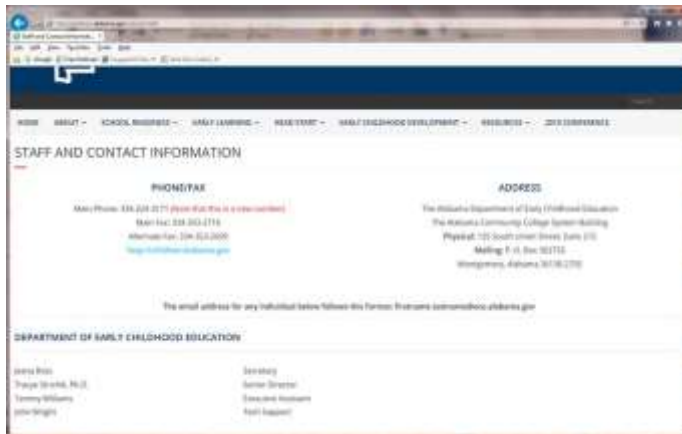

Another scam. Look at the return address. That is sneaky → ece.alabama.gov Looks official. I know I am not doing anything with Alabama. (Looked good but wait...not expecting it and from an unknown source.)

I checked out their email address. I did not find any Amy Dunn, but look at what ECE uses as an email address format. (Checked out actual site.)

So I called them up. (Contacted them directly.)

They know that their emails have been spammed. (Verified).

So I junked it.
